

## **About Us**

### **ICONAT (International Conference on Natural Sciences and Technologies)**

ICONAT (International Conference on Natural Sciences and Technologies) is an international academic conference in the field of natural sciences and technologies. First held in 2019, our conference brings together academics, researchers, and industry professionals each year with different themes.

#### **Our Mission**

To expand the boundaries of scientific knowledge and promote interdisciplinary interaction between natural sciences and technology. ICONAT aims to provide participants with a productive platform where they can share current research findings, establish new collaborations, and participate in scientific discussions.

#### **Scope**

Our conference covers the following areas:

Basic natural sciences such as Physics, Chemistry, Biology,  
Engineering and applied technologies, statistics, science education,  
Information technologies and artificial intelligence, Environmental sciences  
and sustainability,  
Energy systems and renewable energy,  
Materials science and nanotechnology

## Our History

ICONAT was first held in Ukraine in 2019 and has continued uninterrupted since then. Subsequently, it has been organized in Azerbaijan, the Turkish Republic of Northern Cyprus, Bulgaria and Türkiye.

Our conference is managed by an Executive Committee, Advisory Board and Scientific Program Committee composed of expert academics in their fields. All submitted papers are evaluated using a double-blind peer-review system, maintaining high scientific standards.
